

## Make the best choice for your system!

New generation inverters and smart management, for energy systems of any size, at the best price.

With advanced features and characteristics, and a 10-year warranty, Eunice SolaX products provide safety and reliability, ensuring high performance for any type of system.

## Exclusive Partnership Eunice SolaX

In collaboration with the top manufacturer SolaX Power, we offer

a wide range of inverters & battery storage systems for PV facilities of high efficiency.

## Extremely powerful: 9 strenghts for increased yields

- ✓ Indoor or outdoor installation
- ✓ Adaptable to any systems' design, configuration & module type
- ✓ Fully applicable with Aftonomo by Eunice
- ✓ Maximum yields
- ✓ Long service life
- ✓ Plug'n'Play features
- ✓ Ease of use
- ✓ Easy sizing
- ✓ Easy installation

# PRODUCT SERIES

## SINGLE PHASE STRING INVERTERS

0.7kW-8kW

Designed and engineered for small PV arrays to larger residential or small business systems, X1 series is the perfect solution to harvest the maximum amount of energy possible from your PV system.

- Wide Voltage Range (70-600V) • High efficiency up to 97.8% • IP65 • Lightweight • Plug'n'Play WiFi

## THREE PHASE STRING INVERTERS

4.0kW-60kW

X3 series has been developed to offer high quality, efficiency and reliability in a wide range of application, from small building PV systems to large PV parks.

- Up to 1,100 Voltage Range • Multiple MPPTs • High efficiency up to 97.8% • IP65 • Emergency Power Supply • Online monitoring

## SINGLE/THREE PHASE HYBRIDS

3kW-10kW

X-Hybrid series include single and three phase hybrid inverters, in a range of 3kW to 10kW. They are compatible with lithium-ion batteries and they support off-grid operation using their emergency power supply (EPS) mode.

- Remote control • Emergency Power Supply • Master-Slave connection • WiFi • Plug'n'Play installation

## STORAGE INVERTERS - SINGLE/THREE PHASE RETROFIT

3.7kW-10kW

Adaptable to any energy system and in a range of 3.7kW to 10kW, Retrofit single and three phase inverters are the storage solution to ensure energy independence of houses and businesses

- Remote control • Emergency Power Supply • High efficiency up to 97% • Master-Slave connection • WiFi

## BATTERY

5.8kW

T58 - a lithium ion (LFP) high voltage battery - is the flexible, practical and high-performance energy storage solution. Coming on 5.8kWh packs, it is scalable up to 23.2kWh per inverter, to ensure there is enough capacity to store electricity.

- Safest LiFePO4 battery • Scalable capacity • High Voltage • Floor or wall mounted • Online monitoring

## ACCESSORIES

- Remote monitoring - Pocket WiFi
  - Data logger
- Emergency Power Supply (EPS)
