PIPELINE

A hand is shown pointing towards a complex digital network graphic. The graphic consists of numerous white dots connected by thin white lines, forming a web-like structure. A prominent yellow curved line sweeps across the upper left portion of the image. The background is a dark blue gradient with some lighter blue geometric shapes and bokeh light effects.

EUNICE

Empowering Your Journey

OUR VISION

A world where every individual is a NetProsumer, every household is energy autonomous and every state is energy independent.

OUR MISSION

To provide innovative green tech solutions, empower humanity towards a smart green living, and eternally paving the way for Energy Democracy.

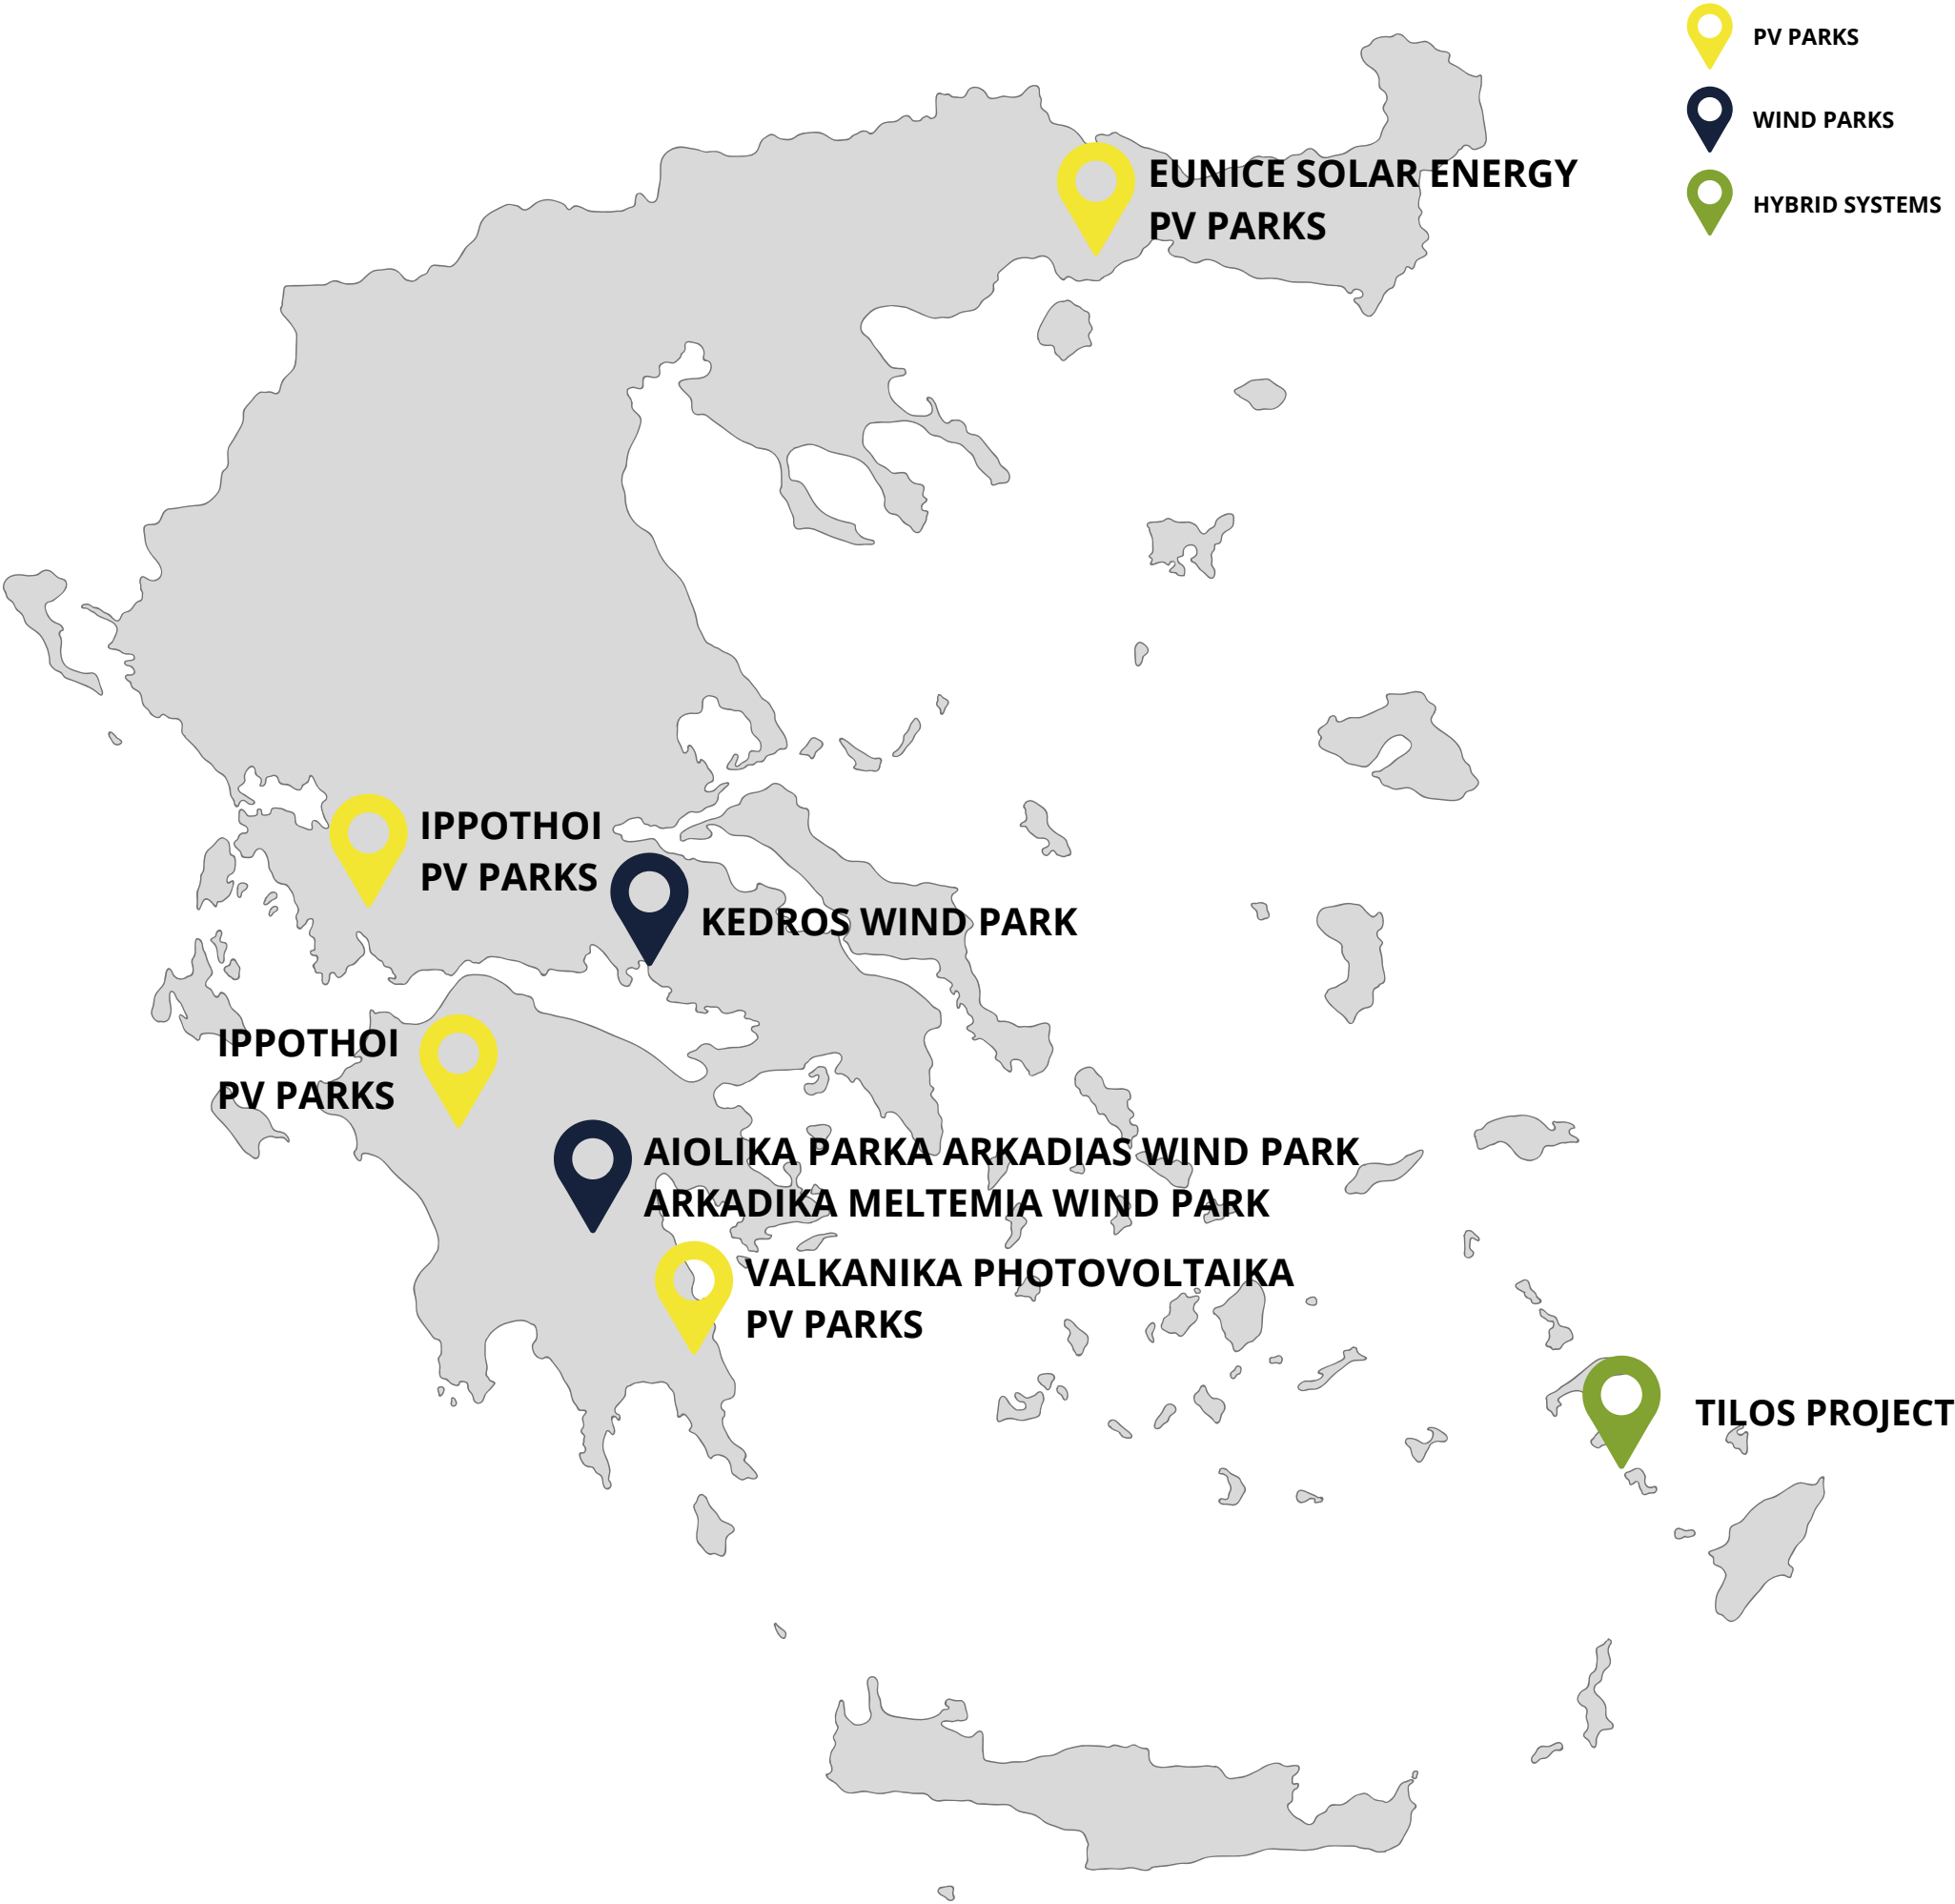

Operating Assets

■ Green Production

EUNICE

ARKADIA BESS

H2 Projects

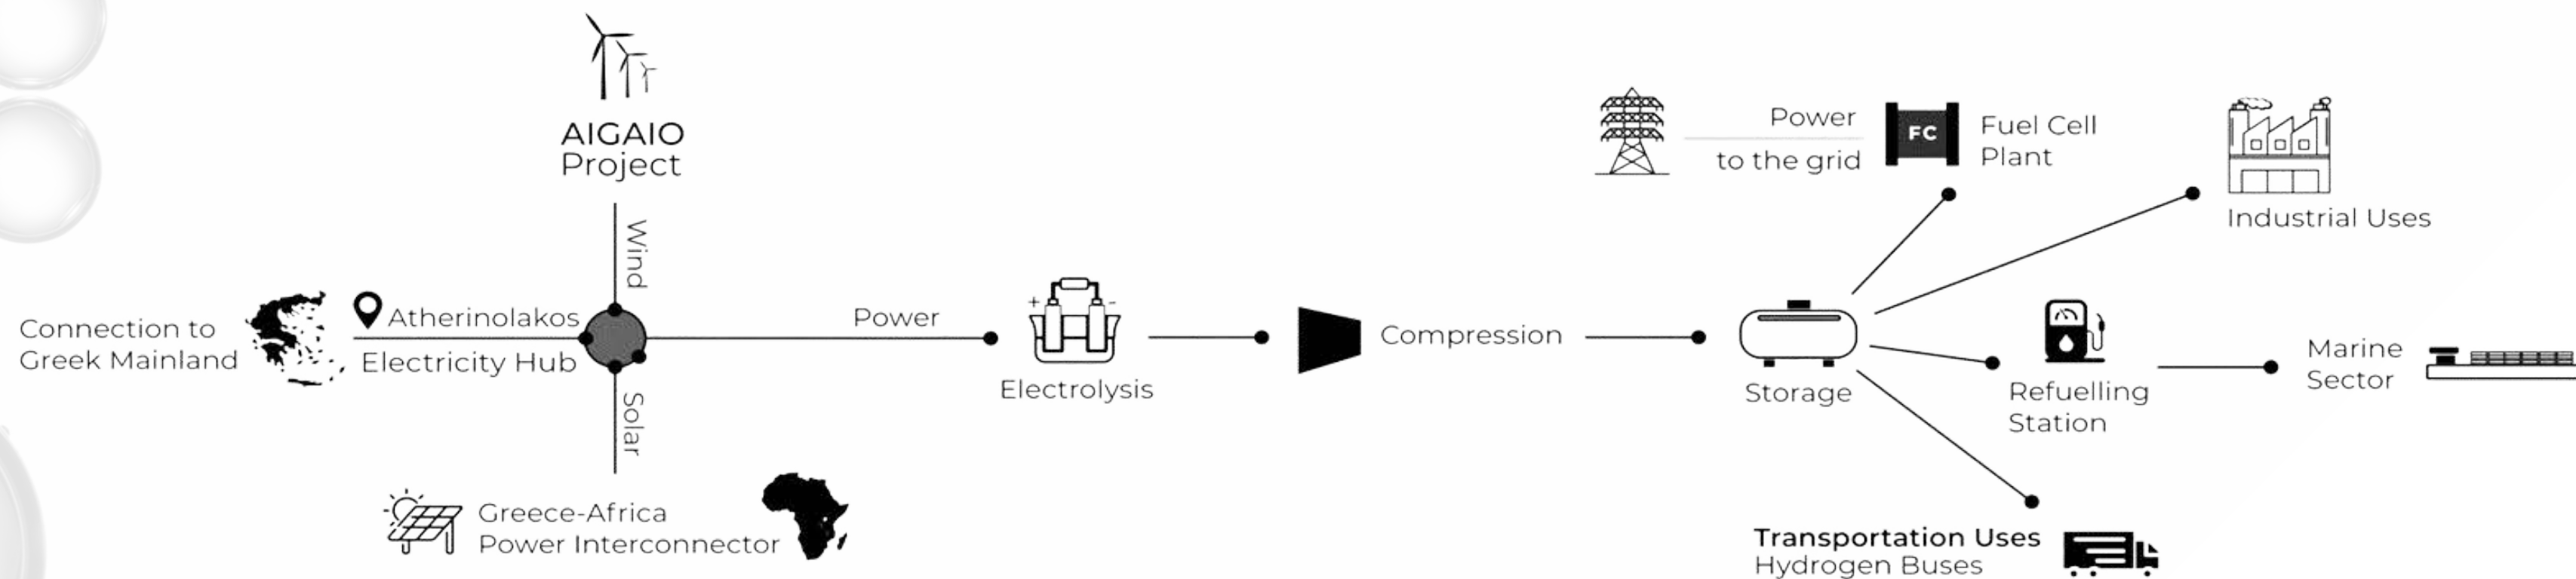

■ Crete Aegean H2 Valley

Green hydrogen will be produced with alkaline electrolyzers near the port of Atherinolakos, and will be used a) for electricity production with PEM fuel cells, and b) as fuel for transportation buses.

Future applications for green H₂ as a fuel, are seen in maritime (green marine H₂ fuel) or in power production at refurbished power plants.

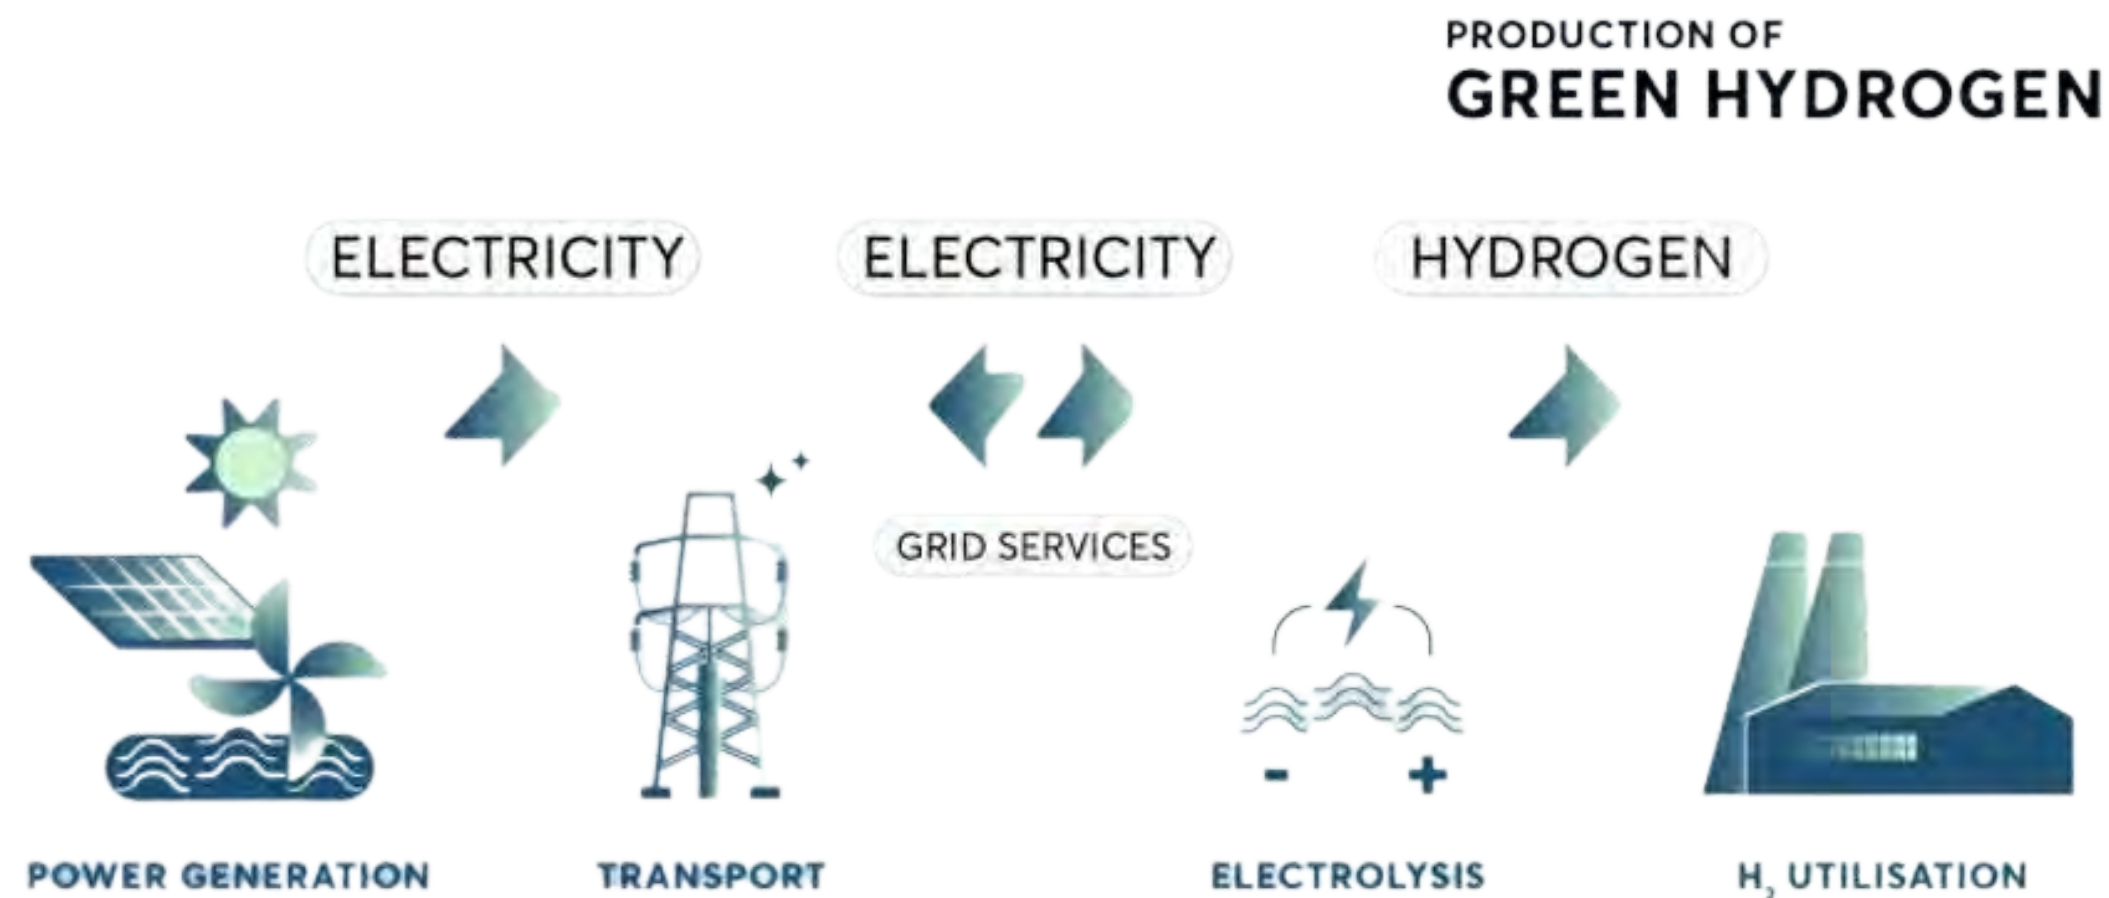

Partnership

Zero Emissions Network Energy System 24_7 ZEN Project

The goal of 24/7 ZEN is to design and build a high-performing 33/100kW scale rSOC power balancing plant and demonstrate its compatibility with electricity and gas grids.

- enhanced materials on the cell level;
- fully operational rSOC system;
- fully integrated, plug and play ecosystem for grid interconnection;
- renewable energy generation;
- transmission system operator; and
- international quality assurance.

Partnership

Crete Renewable Energy Valley **Crete Valley**

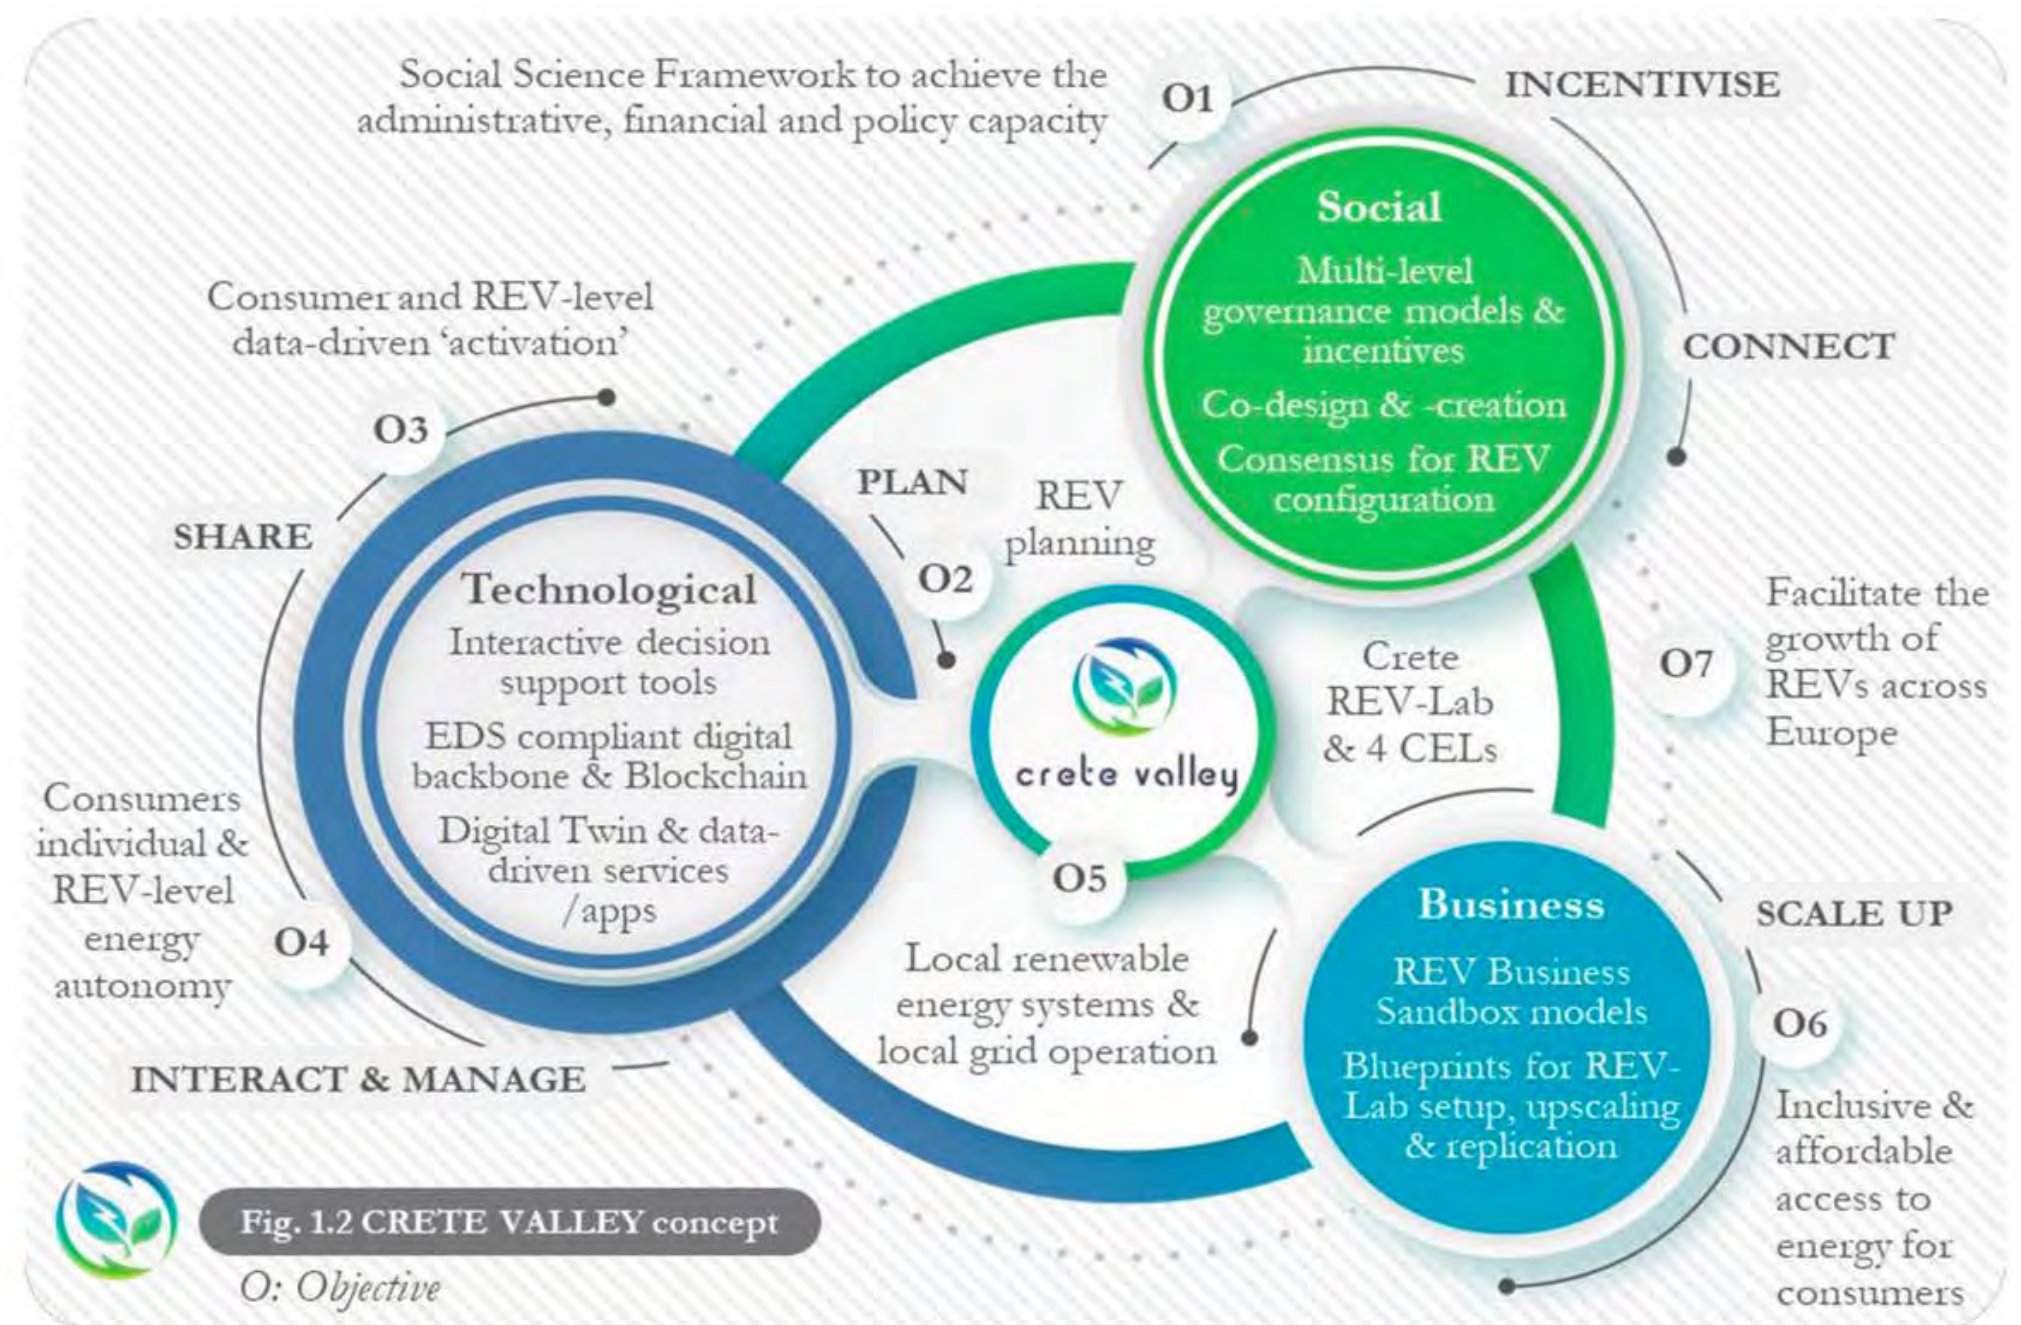

CRETE VALLEY aims to create a Renewable Energy Valley 'Living Lab' (REV-Lab) in Crete. It is envisioned as a decentralized renewable energy system that combines:

- leading-edge ICTs technologies;
- Artificial Intelligence;
- DLT/blockchain;
- Augmented & Mixed Reality with social innovation processes of co-design and co-creation by involving stakeholders (including citizens and businesses);
- easy-to-adopt efficient business models.

Partnership

Consortium is consisted of 43 partners (selected partners are shown above)

EUNICE

Energy Interconnectors

EUNICE

SOUTHERN AEGEAN INTERCONNECTOR

A EUNICE PROJECT

Recognized since 2014, SAI is a Candidate Project for the EU's Important Projects of Common Interest (PCI) list, enhancing energy security, RES adoption, and local growth, with potential links to broader regional initiatives.

- Strategic national interconnector;
- Interconnection of large scale RES generation (Aigaio Project);
- Energy transmission safety.

ENERGY STABILITY BY FACILITATING INTERCONTINENTAL ENERGY TRANSFER

GAP PROJECT

Goal: Enhance energy stability and generation adequacy in the Eastern Mediterranean Sea area.

The First & Only Wind Turbine Made In Greece

- High reliability;
- AC-DC-AC Converter technology;
- Low noise levels & low maintenance costs;
- Customized SCADA;
- Ideal for micro grids and smart grids;
- Directly connected to low voltage grid;
- Compliance with EU grid code requirements (with optional further adaptations);
- Full and smooth integration and co-operation with the S4S-smart energy management system & Aftonomo by Eunice.

A EUNICE COMPANY

joltie

www.joltie.com

A EUNICE COMPANY

Joltie is a leading company in the **eMobility sector in Greece**, investing with its own capital funds on building one of the most expanded charging networks in Greece.

Our mission

- make your journey **smoother and cleaner while reducing your carbon footprint**;
- develop a **national EV Charging network**;

The company currently has more than **180 charging points** nationwide, aiming for **600+ charging points until 2024**.

A EUNICE COMPANY

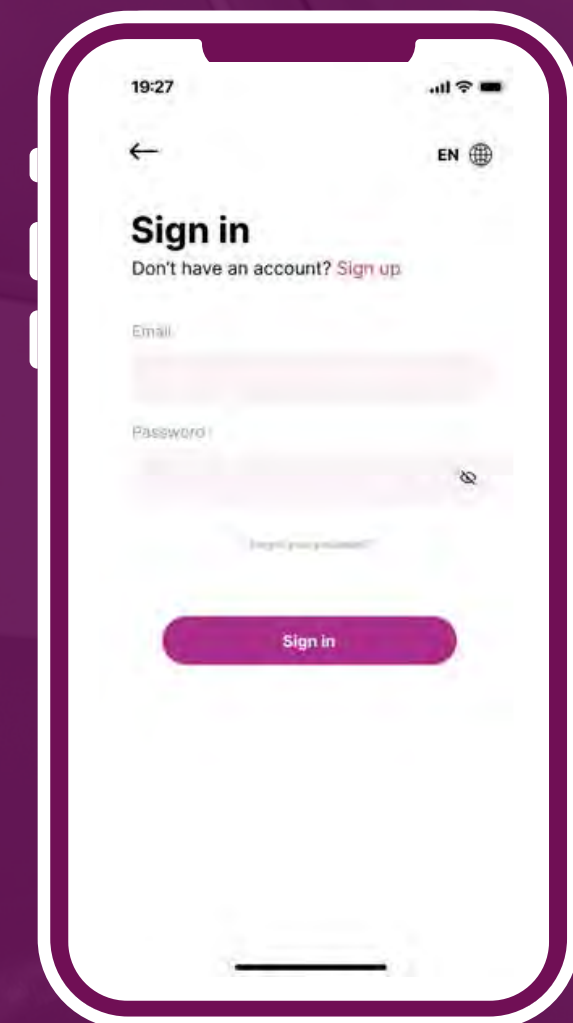

As part of the Eunice Group, we are engaged in the development of electric charger networks in Greece, Cyprus, and Bulgaria. Our chargers, known as Eunice Chargers, are exclusively designed and manufactured in Greece at our group's facilities.

Key Values

- All in One & Risk-free solution;
- High Quality Equipment;
- 24/7 Customer Service;
- eMobility Roaming Services with interoperability with hundred thousands charging points across EU;
- Expanded EV network in public access areas;
- Sustainability & Environment Protection.

The App

Download for free through
Google Play or App Store

We believe that the future is electric, and we are excited to be a part of this revolution.

EUNICE

All-In-One System

100%

Meeting the needs of electricity with green electricity
& zero CO2 emissions

Cost Savings

Via Net Metering

Remote control

Of all functions

Energy independence

In case of power outage

Producer + Consumer + Network = NetProsumer

■ EUNICE App

Software + Smart Devices

- Reduce energy & costs;
- Real time information on your energy flow, distribution & consumption;
- Smart alerts and energy saving tips;
- Load scheduling and ability to switch devices on and off;
- Data analysis & optimized energy management.

Power

■ EUNICE Power

RETAIL:

- The only one supplying the entire customer portfolio with 100% green energy
- Competitive rates and tailor made pricing for commercial and industrial customers.

THE GREEN FLAG:

- Certifies that its owner consumes electricity generated **exclusively from RES;**
- Ensures that the company has a competitive advantage, confirming its business strategy is **characterized by sustainable development;**
- Can be placed in all packages, stores, vehicles, websites as well as in other marketing and communication assets as a **certification of green corporate activity;**
- Creates a positive impact on consumers, who increasingly prefer products and services that are **environmentally friendly certified.**

■ Energy Trading

Energy Stock Markets

Energy Trading

- Day ahead Market;
- Intraday Markets;
- Ballancing Markets (Spot Markets);
- 1st and only company to trade battery storage in day ahead market (Tilos S4S – Hybrid Power Station).

Energy Trading in many European countries

- Greece;
- Italy;
- Germany;
- Bulgaria;
- Hungary.

Unique Sales Proposition (USP)

- Active presence in the Transnational Electricity Trade
- Participants in the Greek European Exchange for all types of electricity products offered
- Active participants in SEECAO and JAO to ensure monthly and annual PTRs.
- -Support in the preparation and operation of financial and physical delivery PPH.

■ Energy Aggregation

Energy Stock Markets

3rd largest RE aggregator in Greece

- Direct asset monitoring;
- Performance forecasting;
- Availability forecasting;
- Advanced stock market trading.

Unique Sales Proposition (USP)

- High quality and fidelity software
- Online monitoring of project operations ensuring minimization of penalty deviations
- Excellent training and experience of the trader department ensuring accuracy of production forecasts and settling any variations in production forecasts

R&D Activities

Human Capital

Our HR department's goal is to empower and nurture our employees, fostering a culture where people are not just valued, but also considered the **heart and soul of our organization**, driving us towards a **shared vision of excellence and success**.

■ EU & National Research & Development Projects

National Research and Development Projects

Near-Shore Wind Turbine with Integrated Holistic Control

- Designing an adaptable 50kW offshore wind turbine;
- Enhancing resilience against coastal elements like humidity and sea salt through advanced design and aeroelastic analysis;
- Optimizing construction dimensions;
- Ensures heightened performance and durability in coastal environments.

Development of Multifunctional Fiber Reinforced Composites with Nano-Modified Matrix Towards Wind Turbine Applications

- Hybrid Nano-Composites (HMS) enhance wind energy components for increased strength and durability with better reliability;
- Developed through a unique method merging glass fiber-reinforced epoxy with carbon-based nanostructures;
- Manufacturing technique tailored for wind turbine use, boosting structural integrity and monitoring capabilities.

Participation in the Development of Two Novel IoT and Energy Saving Tools for Industrial Applications

- Showcases training and certification for Industry 4.0 tools, focusing on Digital Twin, cyber-security, and circular economy;
- Drives local business innovation via knowledge sharing, networking, and collaboration with Competence Centers;
- Facilitates technology transfer, Industry 4.0 upskilling, and energy/additive manufacturing projects.

Development of Novel EOSC Services for Emerging Atmosphere, Underwater & Space Challenges

- Innovating thematic services in Underwater, Atmospheric, and Space research sectors with academia and businesses;
- Tackling EOSC roadmap challenges while promoting Open Science practices;
- Advancing business cases, engaging diverse communities, and fostering development in NEANIAS for EOSC's growth.

■ EU & National Research & Development Projects

EU Projects funded by European Commission

Advanced Energy Performance Assessment Towards Smart Living in Building and District Level

- New business model for energy efficiency and flexibility in commercial rentals;
- Smart energy solutions tested in Spain, Greece, and Ireland;
- Integrated model with advanced services and fair contracts;
- Enhancing trust for wider smart energy adoption.

Smart Energy Services to Solve the SPlit INcentive Problem in the Commercial Rented Sector

- Innovating thematic services in Underwater, Atmospheric, and Space research sectors with academia and businesses;
- Tackling EOSC roadmap challenges while promoting Open Science practices;
- Advancing business cases, engaging diverse communities, and fostering development in NEANIAS for EOSC's growth.

Data Hub for the Creation of Energy Communities at Local Level and to Advance Research on Them

- Develop public energy dataspace for EU Local Energy Communities (LECs);
- Demonstrate dynamic data hub for updated and reliable data;
- Ensure GDPR-compliant privacy and cybersecurity;
- Enable access to AI models and energy services;
- Establish engaged data sharing ecosystem through DLT-based Marketplace;
- Provide tools for LEC stakeholders' activities.

HiGh fidElity Modelling for small wINd turbines

- Develop Smart Energy Performance Certificate using digitized tools;
- Retrieve building info from BIM literacy for as-designed and actual performance;
- New scheme includes water consumption, noise pollution, and acoustics;
- Applicable to building complexes for neighborhood-scale energy certification.

Data Hub for the Creation of Energy Communities at Local Level and to Advance Research on Them

The goal of 24/7 ZEN is to design and build a high-performing 33/100kW scale rSOC power balancing plant and demonstrate its compatibility with electricity and gas grids.
